14 CFR §61.125 - Aeronautical knowledge	Date Covered	Ground Time	GFI	Date Covered	Ground Time	Ē	Date Covered	Ground Time	GFI	Date Covered	Ground Time	Ē	Date Covered	Ground Time	GFI
Applicable Federal Aviation Regulations of this chapter that relate to private pilot privileges, limitations, and flight operations;															
(2) Accident reporting requirements of the National Transportation Safety Board;															
(3) Use of the applicable portions of the "Aeronautical Information Manual" and FAA advisory circulars;															
(4) Use of aeronautical charts for VFR navigation using pilotage, dead reckoning, and navigation systems;															
(5) Radio communication procedures;															
(6) Recognition of critical weather situations from the ground and in flight, windshear avoidance, and the procurement and use of aeronautical weather reports and forecasts;															
(7) Safe and efficient operation of aircraft, including collision avoidance, and recognition and avoidance of wake turbulence;															
(8) Effects of density altitude on takeoff and climb performance;															
(9) Weight and balance computations;															
(10) Principles of aerodynamics, powerplants, and aircraft systems;															
(11) Stall awareness, spin entry, spins, and spin recovery techniques for the airplane and glider category ratings;															
(12) Aeronautical decision making and judgment; and															
(13) Preflight action that includes -															
(i) How to obtain information on runway lengths at airports of intended use, data on takeoff and landing distances, weather reports and forecasts, and fuel requirements; and															
(ii) How to plan for alternatives if the planned flight cannot be completed or delays are encountered
